

# HIGH-FREQUENCY / RADIOSURGICAL DEVICES PRODUCT OVERVIEW

## RF Blade\* PS-50

The economic alternative for all private practices where only minor procedures are performed

- Monopolar cutting
- Monopolar coagulation -also via monopolar forceps
- Monopolar pure coagulation
- Bipolar coagulation
- Hand piece or foot switch operation
- memory of last setting used
- Switching to the desired output mode by pressing the buttons at the handpiece

Output: maximum 60W/4MHZ

## RF Blade\* PSP-100

The universal device for all minor and major surgeries making the scalpel superfluous.

- Monopolar cutting
- Monopolar coagulation -also via monopolar forceps
- Monopolar pure coagulation
- Bipolar coagulation
- Hand piece or foot switch operation
- memory of last setting used
- Switching to the desired output mode by pressing the buttons at the handpiece

Output: maximum 120W/2.2MHZ

## RF Blade\* PSP-100 'P'

the sensational new development in the field of electrosurgery for all minor and major surgeries

- Monopolar cutting
- Monopolar cutting with simultaneous coagulation
- Monopolar coagulation -also via monopolar forceps
- Monopolar coagulation with smart switch-off
- Monopolar spray coagulation
- Bipolar coagulation
- Bipolar coagulation with smart switch-on/off
- Hand piece or foot switch operation
- 4 individual setting can be saved
- Intelligent tissue resistance detection system
- Switching to the desired output mode by pressing the buttons at the hand piece or squeezing the tips of the bipolar forceps together

Output: maximum 120W/2.2MHZ
